Work: No. 8, Newlayout , behind living faith church, Jebbu Bassa Jos, Plateau state., 930221 Jos (Nigeria)

ABOUT ME

I'm a Full-Stack Web and React Native Developer with a background in Electrical & Electronics Engineering and a passion for building practical, scalable, and high-performance digital products across web and mobile. My engineering background has strengthened my analytical thinking, problem-solving, and systems approach, which I bring into software development. I build modern web applications with **React.js**, **Next.js**, **Express.js**, and **FastAPI**, and mobile applications with **React Native** and **Expo**, creating seamless experiences across platforms.

I enjoy turning ideas into functional products, from responsive interfaces and REST APIs to mobile applications and complete full-stack systems. I work with modern development practices including component-based architecture, reusable UI patterns, API integration, performance optimization, Git/GitHub, and cloud deployment.

Beyond development, I have a strong interest in **UI/UX**, **emerging technologies**, **automation**, and **technology-driven solutions**. My work spans personal products, client projects, and collaborative development, giving me experience adapting to different requirements and solving real-world problems.

I'm driven by the challenge of taking an idea from concept to a working product. My goal is to combine my engineering mindset, software development skills, and continuous learning to build technology that is useful, reliable, and impactful.

WORK EXPERIENCE

AY Creative Technologies – Kano, Nigeria

Senior Frontend React Developer

[07/05/2025 – Current]

At AY Creative Technologies, I work as a **Frontend Developer**, building responsive and high-performance web applications using **React.js** and **NEXTJS**. My role involves creating interactive user interfaces, collaborating with designers and backend developers, and ensuring seamless user experiences across devices.

Key Responsibilities:

- Developed modern web interfaces using **React**, **JavaScript (ES6+)**, and **Vite** for optimized performance.
- Styled applications with **Tailwind CSS**, **Bootstrap**, **Material UI**, and **Ant Design**, ensuring responsive and mobile-friendly layouts.
- Deployed applications using **Netlify**, **Vercel** and **Render**, managed version control with **Git** and **GitHub**, and integrated RESTful APIs.
- Translated UI/UX designs into reusable components and ensured cross-browser compatibility and accessibility.
- Maintained clean code practices, conducted code reviews, and collaborated in Agile workflows.

Life with Alacrity – California, United States

Website: <https://www.lifewithalacrity.com> | Email address: ChristopherA@LifeWithAlacrity.com | Name of unit or department: Blockchain & Decentralized Identity Architecture - **Business or sector:** Information and communication
Link <https://github.com/lifewithalacrity/www.LifeWithAlacrity.com>

Frontend Developer

[15/09/2023 – Current]

- Redesign of Website
- Data Entry
- Development of Website
- Fixing errors in Hosting from github

Sport Tech West – Las Vegas, United States

Website: <http://sportstechwest.com> | Email address: rashadlwest@gmail.com | Name of unit or department: Sports - **Business or sector:** Other service activities
Link <https://github.com/rashadwest/Sportstechwest>

Web developer

[28/07/2024 – Current]

In Sports Tech West, I am in charge of:

1. Adding new features to the website
2. Adding contents to their website
3. Posting contents on their social media handles(Social Media Manager).
4. Editing contents to meet up with SEO rules, so as to increase traffic

Master Eye Security Services Limited – Jos Plateau, Nigeria

Web programmer

[23/01/2023 – Current]

In Master Eye Security Services Limited, I am in charge of:

1. Developing their website.
2. Adding new features to increase users interactions like add comments using Disqus.
3. Managing their social media pages like Tiktok, Facebook and Instagram.

Coding for kids – Remote, Nigeria

Coding Instructor

[01/12/2025 – Current]

I'm responsible for tutoring children from the age of 8-14 HTML, CSS, and Javascript

AY CREATIVE TECHNOLOGY – Kano, Nigeria

App developer

[07/05/2025 – Current]

Mobile application developers implement applications software for mobile devices, based on the designs provided, using general or specific development tools for device operating systems.

EDUCATION AND TRAINING

B.Eng in Electrical Electronics Engineering

Abubakar Tafawa Balewa University [19/11/2017 – 28/10/2024]

Address: Along, Kano Rd, Bauchi, Bauchi (Nigeria) | Website: <https://atbu.edu.ng/> | Field(s) of study: Engineering, manufacturing and construction: • Electricity and energy • Electronics and automation | Final grade: Second Class Upper

Introduction to Front-End Development

Coursera - Meta [23/07/2023 – 23/08/2023]

City: Carlifornia | Country: United States | Website: <https://www.coursera.org/account/accomplishments/verify/PYVLS7GBFAA7>

Version Control

Coursera - Meta [01/08/2023 – 13/08/2023]

City: Carlifornia | Country: United States | Website: <https://www.coursera.org/account/accomplishments/verify/RW4ZSAVBC4T6>

Developing Interpersonal Skills

Coursera - IBM [10/07/2023 – 24/07/2023]

City: California | Country: United States | Website: <https://coursera.org/verify/MGSZC6NC7V7P>

National Diploma in Electrical Electronics Engineering Technology

Coursera - IBM [19/10/2014 – 29/06/2017]

Address: Gwalla-meji, Bauchi 740102, Bauchi, 740102 Bauchi (Nigeria)

Frontend Engineer

Coursera - Meta [23/07/2023 – Current]

City: California | Website: <https://coursera.org>

Satellite Installation

Home of Space and Renewable Technology [15/08/2015 – 31/08/2016]

City: Jos | Country: Nigeria

LANGUAGE SKILLS

Mother tongue(s): English

Other language(s):

Hausa

LISTENING C1 **READING** B1 **WRITING** B1

SPOKEN PRODUCTION B1 **SPOKEN INTERACTION** B2

French

LISTENING A2 **READING** A2 **WRITING** A1

SPOKEN PRODUCTION B1 **SPOKEN INTERACTION** A2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Microsoft Office package: Microsoft Word, Excel, PowerPoint, Access / Google meet, Microsoft powerpoint / implement front-end website design / Experience with PHP, SQL, HTML, CSS, JavaScript / Web Technologies Fundamentals - HTML, CSS / Headless Website: Gatsby, Nuxt, Jekyll, 11ty / Web development (JS frontend, Java Servlets and MySQL backend) / Parse and RESTful backend APIs integration, JSON parsing / Video Conferencing (Zoom, Teams, Skype, Webex) - Advanced / Virtual Assistance / Familiar with Unit, e2e, Integration, Coverage, and Functional testing / JavaScript Framework

PROJECTS

[25/05/2024 – 10/10/2024]

Design and Construction of Solar Float Lamp for Engineering Complex Block C This project aimed to design, construct, and test an automatic solar-powered flood lamp system for Block C, Abubakar Tafawa Balewa University, Bauchi, with the primary objective of providing efficient and sustainable lighting. To achieve this goal, a comprehensive methodology was adopted, involving a thorough analysis of the site's lighting requirements, consideration of factors such as area coverage, brightness levels, and operational hours, and calculations for illumination, lumen, and energy requirements to ensure optimal configuration. The system utilized a 215W solar panel array, 60Ah battery, and microcontroller-controlled automatic lighting mechanism, switching LED lights on/off based on ambient conditions. Extensive testing yielded promising results, including efficient energy capture, storage, and lighting performance, with a total lumen output of 6232.2 lux. Notably, the system demonstrated an energy efficiency of 22% and reduced energy consumption by 75% compared to traditional floodlights. The findings also revealed that the system's reliability and efficiency were further improved through adjustments to control unit settings and solar panel positioning. The project's outcomes have significant implications for sustainable development, energy efficiency, and environmental conservation, underscoring the potential for widespread adoption of solar-powered lighting solutions in similar settings. The successful implementation of this system serves as a model for future solar-powered lighting initiatives, promoting sustainable practices and reducing carbon footprint. The strength of this work lies in its innovative approach to harnessing renewable energy, its potential for scalability and replicability, and its contribution to the development of sustainable infrastructure. Overall, this project demonstrates the feasibility and effectiveness of solar-powered lighting solutions for public spaces, offering numerous benefits, including reduced energy costs, minimized reliance on non-renewable energy sources, and enhanced sustainability.

VOLUNTEERING

[21/10/2022 – 21/12/2022] Jos

Physical coding tutor Here's a more detailed and impactful version of your description:

At Codejika, I served as a Code Instructor, where I specialized in teaching secondary school students the fundamentals of web development. My role involved guiding students through the process of building functional and aesthetically pleasing websites using a variety of code editors, including Notepad, Notepad++, VS Code, and Sublime Text. I introduced them to essential web development languages such as HTML, CSS, and JavaScript, ensuring they gained a solid foundation in both the theoretical and practical aspects of coding. Through interactive lessons and hands-on projects, I empowered students to create their own web pages, fostering critical thinking, creativity, and problem-solving skills. By the end of the program, many students were confident in their ability to design and develop fully functional websites independently.

[15/04/2023 – Current] Nigeria

Tech Support Specialist At Kitron Green Initiatives, I combine my passion for technology with a commitment to excellence in my dual roles as a web developer and tech support specialist. As a web developer, I take pride in designing and maintaining responsive, user-friendly websites that align with the organization's vision. I focus on writing clean, efficient code and creating engaging web platforms that perform seamlessly across devices. In my role as a tech support specialist, I enjoy solving problems and ensuring smooth operations by diagnosing and resolving technical issues, maintaining IT systems, and empowering team members to utilize technology effectively. By merging creativity, technical expertise, and a proactive approach, I contribute to the success and growth of Kitron Green Initiatives while driving innovation within the organization.
